

STUDENT SEMINAR
ON
OZONE DEPLETION: CAUSES AND IMPACTS

Organised by: Department of Geography, Hazi A.K. Khan College Under the Guidance of IQAC

DATE: 28.05.2022

TIME: 12.00 Noon

LOCATION: Room No-110, HAZI A.K. KHAN COLLEGE

OBJECTIVES: The main objectives of the seminar are to –

1. Present the necessity of ozone in stratosphere
2. Know about stratospheric ozone depletion
3. Know about stratospheric ozone depletion over the Arctic
4. Know about ozone depletion and climate change.

REPORT

A one-day student seminar on “OZONE DEPLETION: CAUSES AND IMPACTS” was organised by department of Geography on 28.05.2022 at Room No-110, Hazi A.K. Khan College. The seminar was chaired by Prottyus Kumar Ghosh, Head of Department, Department of Geography, Hazi A. K. Khan College.

The seminar started with the welcome address by Sri Prottyus Kumar Ghosh, HOD, Department of Geography at 11.30 A.M. Shri Bubai Ghosh delivered the inaugural speech of the seminar.

After the inaugural speech the seminar there was a presentation session where students presented their papers related to the subject. Students of the department through their presentations tried to aware participants about the causes and mechanisms of ozone depletion, with a specific emphasis on the scientific principles underlying this phenomenon. The environmental impacts of ozone depletion were highlighted, particularly the heightened levels of ultraviolet (UV) radiation, which have adverse effects on ecosystems, biodiversity, and human health.

The seminar concluded with a warm vote of thanks by Sri Parimal Karmakar, Faculty, Department of Geography.

Outcomes of the Seminar:

- ✓ The seminar provided comprehensive knowledge about the crucial role of the ozone layer in shielding life on Earth from harmful ultraviolet (UV) radiation and the detrimental effects of human activities on this protective layer.
- ✓ Attendees were visibly motivated to take immediate and long-term actions to reduce the use of ozone-depleting substances and actively contribute to protecting the ozone layer.
- ✓ The seminar instilled a sense of responsibility, prompting participants to actively engage in advocating for ozone-friendly practices and encouraging the adoption of alternative technologies.

SWOC Analysis:

Strengths:

The seminar's success was evident through the active engagement and enthusiasm of the student participants, who demonstrated a strong interest in environmental issues.

Weaknesses:

While limited resources presented initial challenges, creative fundraising strategies and cost-effective approaches allowed the seminar to proceed successfully.

Opportunities:

The seminar effectively educated and inspired the student about the significance of ozone protection and the global efforts underway to combat ozone depletion.

Challenges:

Managing event logistics efficiently through careful planning posed a significant challenge, as it required meticulous attention to detail and coordination to ensure the smooth execution of the seminar. The experience gained in overcoming this challenge will inform and improve the planning process for future seminars.

About the College

The generous Hazi Abdul Kader Khan who dreamed of a college at Hariharpara, a remote village in the district of Murshidabad, donated a precious piece of land on which Hazi A. K. Khan College was established. The college began its auspicious journey on 8th September, 2008. Affiliated to the University of Kalyani, Hazi A. K. Khan College aspires to function as a centre for higher studies.

About the Seminar

Ozone depletion is the steady lowering of the Earth's ozone layer in the high atmosphere as a result of human activity and the discharge of chemicals including gaseous chlorine or bromine. The thinning is mainly noticeable over Antarctica and in the polar-regions. Because it causes more ultraviolet (UV) radiation to reach the Earth's surface, which increases the risk of skin cancer, eye cataracts, genetic damage, and immune system deterioration, ozone depletion is a significant environmental issue. The main objectives of this seminar is to present about the necessity of ozone in stratosphere, to know about stratospheric ozone depletion, to know about stratospheric ozone depletion over the Arctic and know about ozone depletion and climate change.
